

WGDEEP

Working Group on the Biology and Assessment of Deep-sea Fisheries Resources

Fisheries Resources
Steering Group (FRSG)

RESEARCH FOCUS

- WGDEEP provides scientific advice on 30 different fish stocks.
- Including stocks of deep-water fish species and those on shelf areas.
- The stocks are found in all ICES ecoregions, ranging from the Barents Sea in the north to Gibraltar in the south, and Azores and Greenland in west.

OUR OBJECTIVE

To assess and provide the basis for scientific advice on maximum and sustainable fishing opportunities for deep-water fish stocks.

OUR EXPERTISE

- Biological knowledge of the fish stocks handled by the group.
- Ecological knowledge related to these stocks.
- Analytical and data limited stock assessment, as we assess stocks with varying levels of data availability.
